Affordable H&S Consultancy Packages to suit your business needs

ON-SITE REVIEW

A H&S Expert will come to you to complete an on-site Site Review. This will give you a good overview of what's happening on-site to assess if good practices are being followed. If not, then we will document the controls that should be implemented to keep everyone safe from harm.

The review considers 141 good practice risk controls. Once completed and reviewed by our H&S team you will receive a quality review document and summary.

If multiple reviews are carried out, we can analyse the information to provide data on H&S trends and performance. This will assist with identifying key areas of risk, taking steps to mitigate the risk and help tailor on-site training with contractors.

PROJECT PRO PACKAGE

Project Pro is an affordable solution that will assist you when you have a more complex site or require a customised SSSP. One of our H&S experts will work with you to tailor a customised SSSP specific to your sites requirements.

Project Pro includes:

- A custom SSSP
- 2x Hazard boards with QR codes
- Site resources

Ability to upgrade to include Project Plus at an additional cost.

ADDITIONAL SERVICES AVAILABLE

- **PRE-QUAL SUPPORT**

Getting ready for a Pre-Qualification assessment? Our Health & Safety experts can help you with any part of this process.

- **HEALTH & SAFETY ASSESSMENT**

Want to know that your business is meeting good practice? Our Health & Safety experts can carry out a H&S assessment for you and let you know what you are doing well, and where you might benefit from some improvements.

- **HAZARD IDENTIFICATION & RISK MANAGEMENT**

Our Health & Safety experts can assist you in identifying hazards/risks in your business and what are the best controls to implement. Or we can just focus on your top 5 or 10 risks.

- **CUSTOMISED PACKAGE**

Any other H&S Consultancy Services that you require for your business.

Disclaimer: Travel costs will be calculated as an additional cost.
